

The IMO Smart Search made Smarter

IMO Problem (IT)[®] Terminology helps organizations overcome the challenge of transitioning to ICD-10. With IMO Smart Search, healthcare professionals can quickly find the most specific diagnoses without having to worry about searching over 68,000 ICD-10-CM codes directly. By simply searching for medical terms they are naturally familiar with, clinicians can focus on providing patients with high quality care, and document health issues at the desired level of specificity.

About IMO

Intelligent Medical Objects (IMO) develops, manages, and licenses medical vocabularies and software applications that standardize healthcare organizations' medical terminology. IMO's simple, yet sophisticated; terminology database includes over 500,000 terms that express clinical intent. This terminology service enables EHR systems to become more clinician-friendly resulting in higher physician utilization and satisfaction, as well as accelerating revenue cycle.

eClinicalWorks Smart Search: Powered by IMO Terminology

Improves clinician's diagnosis search for Problem List and Visits

- Makes searching for terms and codes faster
- Captures detailed clinical intent
- Improves clinical workflow, saving the clinician's time
- Increases clinician satisfaction with EHR

Easier transition to ICD-10-CM for physicians and organizations

- Every term in **Problem  Terminology** automatically maps to ICD-10 codes

Maximizes the granularity of diagnoses captured in eClinicalWorks

- Allows for greater granularity than SNOMED® & ICD codes
- IMO terms such as “stage 2, Breast CA” are not found in ICD or SNOMED® descriptions

Enables more efficient billing

- Every IMO term maps to an appropriate billing code
- AHIMA provides advisory services to IMO on all ICD-CM mappings

Seamlessly mapped to standards required for Meaningful Use

- Allows for easier Meaningful Use Stage 2 attestation
- IMO terms map to SNOMED®, ICD-9, and ICD-10 codes

Patient
Breast Cancer

Physician
Breast Cancer Stage 2
ICD9 174.9

HIM Services

372137005

IMO's **Problem  Clinical Interface Terminology** allows clinicians to quickly and accurately find diagnoses and problems using highly granular, clinically meaningful terms. This results in more precise documentation, increased EHR utilization and greater physician satisfaction. These terms seamlessly map to ICD-9, ICD-10 and SNOMED CT®, streamlining clinical workflows and providing more accurate billing codes.
