Viewing Orders from the Office Visit Screen

- From the Office Visits Screen, the patient's name will be highlighted green if any treatment (Labs, Diagnostic Imaging, Procedures, Rx, Referrals, Actions) has been ordered in the Progress Note.
- To view the order, click the check box next to the patient's name
- Click View Orders on the bottom of the screen

The screenshot shows the 'Office Visits' interface. At the top, there are filters for Providers/Resources (All Willis, Sam, Multi), Appt. Time (All Day), View (All), and Facility (Test - BHN - Banner Health N). A table lists visits with columns for Visit Type, Appt Time, Patient Name, P/R, Reason, and Sex. The first row, 'KMCBrock, Lee', is highlighted in green. A red circle with the number '1' is around the patient name. Below the table, there are navigation buttons: View Progress Notes, Check In/Out, Billing Data, Refresh, View Orders (circled in red with a '2'), and Lock Progress Notes. On the right, a 'Patient Orders (KMCBrock, Lee)' window is open, showing sections for Current Labs, Current Diagnostic Imaging, Current Procedures, Rx (circled in red), Immunizations/Therapeutic Injections, Referrals, and Actions.
